DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 5/13/08. Accordingly, claims 1-7, 9-18 and 20 are currently pending; and claims 8 and 19 are canceled.

REASONS FOR ALLOWANCE

2. Claims 1-7, 9-18 and 20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-7, 9-18 and 20 are allowed with reasons based on Applicant's REMARK, pages 6 and 7, of the Amendment filed on 1/7/08 and Applicant's REMARK, page 6, of the Amendment filed on 5/13/08, and with reasons stated below:

-Regarding independent claim 1, none of prior art of record teaches or suggests a carrier recovery system, as claimed. Hwang (2004/0136474), previously cited, teaches the claimed invention except failing to teach a DC detector comprising an adder for adding a quadrature-phase baseband signal to a feedback signal for producing an added value; delay unit coupled to the adder for generating an output being the added value delayed by a predetermined time; and multiplier coupled to the delay unit is used for multiplying the output of the delay unit by a predetermined coefficient to produce the feedback signal. In comparisons, Hwang's DC detector comprises a multiplier for multiplying a quadrature-phase baseband signal with a delayed, sign-extracted in-phase base band signal. It would not have been obvious for one skilled in the art to implement Hwang with other prior art for leading the implementation to the claimed invention.

-Regarding independent claim 11, none of prior art of record teaches or suggests a carrier recovery method, as claimed. Hwang teaches the claimed invention except failing to teach procedure of measuring the DC offset of a quadrature-phase baseband signal comprising: adding

the quadrature-phase baseband signal and a feedback signal to produce an added value; delaying the added value by a predetermined time; and multiplying the delayed added value by a predetermined coefficient to produce the feedback signal. In comparisons, Hwang's procedure of measuring the DC offset of a quadrature-phase baseband signal comprising: multiplying a quadrature-phase baseband signal with a delayed, sign-extracted in-phase base band signal. It would not have been obvious for one skilled in the art to implement Hwang with other prior art for leading the implementation to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
